## Make word search online printable

Create your own custom word search worksheets! A variety of options are available, such as font size, font style, lowercase or uppercase letters, grid shape, word placement, and more. Experiment with the following settings to find the best results for printing. You may also need to adjust your browser's page layout (change margins, header/footer, or switch to horizontal/vertical mode), and then go to Print Preview before printing. These options are located under the browser's File menu. Landscape mode works best for many puzzles. Also, set the margins to 0.5 or less. Before you create your puzzle, you may also want to highlight the word list and press Ctrl+C to keep a copy of it on your computer clipboard. This way, if you need to go back and change the settings, you can paste the words into the space by pressing Ctrl+V. Otherwise you will have to type them again. (These shortcut commands work on Windows systems.) NOTE: If you are concerned about inappropriate words in randomized letters, be sure to read before sharing with students.
